

Somaiya Vidyavihar University
K. J. Somaiya School of Engineering
Department of Electronics and Telecommunication Engineering

Year: TY B.Tech
Semester: V

Program: EXTC

Name of the Course: Database Management System Laboratory (216U03E513)

Term: July 2026 to Nov 2026 (2026-2027)

Date: 24/07/2026

Scheme for Internal Assessment (IA)

Programme	Electronics & Telecommunication Engineering	Class	TY
Academic year:	2026-27	Course Code and Name	216U03E513 Database Management System
Semester:	V		
Faculty In-charge	Mr.Shilpa N.Vatkar		

Distribution of 20 Marks. IA marks will be average of 2 IAs	The student will be evaluated based on two tasks of 20 marks each. If any of the tasks given is not completed / submitted / shown / evaluated then the marks assigned for that task will be scale down to 15. Online quiz: Quiz will be taken with 10 to 15 questions which will have 1mark/2 marks MCQ. Problem solving Test: Problems based on given modules. Note: if any students fail to attempt any IA then assessment of marks will be out of 15.		
Sr. No.	Task	Description of task	Schedule
1	Quiz	Module No. 1,2,3	Third week of August
2	SQL in Action: Business Analytics Queries (OFFLINE) Will be conducted in class.	Efficient SQL writing and real-world use.	September 1 st Week

Department of Electronics and Telecommunication Engineering

Rubric for Internal Assessment

Title: QueryCraft: Efficient SQL Writing and Real-World Use
Total Marks: 20

Criteria	High	Moderate	Low
SQL Query Accuracy and Correctness (8 marks)	7–8 Marks: Queries are syntactically correct, logically accurate, and produce the expected results without errors.	4–6 Marks: Queries are mostly correct with minor syntax or logical errors that require small corrections.	0–3 Marks: Queries contain major syntax/logical errors or fail to produce the required output.
Application of SQL Concepts (7 marks)	6–7 Marks: Effectively applies SQL concepts such as joins, aggregate functions, subqueries, grouping, and filtering to solve real-world problems.	3–5 Marks: Applies basic SQL concepts correctly but demonstrates limited use of advanced features.	0–2 Marks: Demonstrates limited understanding of SQL concepts and cannot solve practical database problems effectively.
Database Design and Query Efficiency (5 marks)	5 Marks: Database schema is well-designed with appropriate constraints, and queries are efficient and optimized.	3–4 Marks: Database design is functional with minor issues, and queries execute correctly but lack optimization.	0–2 Marks: Database design is incomplete or incorrect, with inefficient or non-functional SQL queries.

Test Syllabus

Max. Marks	Module no	CO	Remarks if any
30	1,2,3	1,2,3	

Date: 23/07/2026
