

Somaiya Vidyavihar University
K. J. Somaiya School of Engineering

Evaluation scheme for laboratory/tutorial continuous assessment (LAB CA)

Department	Electronics & Telecommunication Engineering		
Programme	Electronics & Telecommunication Engineering	Year	SY
Academic year	2025-2026	Course Code and Name	216U03L402 Analog Electronics laboratory
Semester	IV		
Faculty In-charge(s)	Dr. Sandeep R. Sainkar		

Distribution of LAB CA marks	The student will be evaluated based on following tasks for lab. CA. If any of the tasks given is not completed / submitted / shown / evaluated, then the marks assigned for that task will be ZERO.			
	Task	Description	Tentative schedule (week/month)	Marks
	Component 1	Experiments will be performed in the laboratory	Every week starting from first/second week of term	Each experiment will be evaluated out of 25 marks and average of all experiments will be taken
	Component 2	Practical/ Orals based on simulation experiments	Second-Third week of April	25

Calculation of final LAB CA marks (out of 50):

Component 1	Component 2	
Laboratory experiments/tutorials	Practical/ Orals based on simulation experiments	
Maximum marks <u>25</u>	Maximum marks <u>25</u>	
Final LAB CA Marks (Out of 50) = Laboratory experiments (out of <u>25</u>) + practical/Orals (out of <u>25</u>)

Evaluation Rubrics for Laboratory experiments:

Criterion/ Performance levels	High (Marks)	Moderate (Marks)	Low (Marks)
Circuit implementation and measurement	High Contribution (8-10)	Moderate contribution (4-7)	Low contribution (0-3)
Interpretation of result	Interpretation with appropriate understanding (8-10)	Interpretation but less understanding (4-7)	Interpretation with no understanding (0-3)
Experiment report submission	Timely Submission (4-5)	Submission after next immediate turn but within a month (2-3)	Submission after a month (0-1)

Evaluation Rubrics for Practical/Orals:

Sr. No	Description	Max. Marks
1	- A task on practical measurements based on experiments performed will be given and students are expected to interpret the results based on observations - Questions relevant to the course and lab experiments will be asked and the students are expected to give answers orally or may be in some cases supported by the equations, diagrams, tables etc. written on the sheet - The marks will be given based on the - Understanding level of the student - The way the student explains i.e. approach of the student towards the question - Correctness and appropriateness of the answer with respect to question	
2	Oral questions based on laboratory experiments	10
3	Practical task based on laboratory experiments	15
	Total	25
