IA Scheme and ISE Syllabus

Reflection Journal Rubrics

Criteria	5	4	3	2	1
Completeness & Regularity	All lectures recorded with date, day, and topic; no missing entries	Minor omissions	Several missing entries	Many missing entries	Largely incomplete
Quality of Self-Reflection	Deep, thoughtful reflection showing clear understanding	Meaningful reflection with basic understanding	Mostly descriptive reflection	Very shallow reflection	No genuine reflection
Relevance to Lecture Content	Reflection clearly linked to lecture topics	Mostly relevant	Partially relevant	Weak linkage	Not related
Clarity & Neatness	Very neat, well-organized, easy to read	Generally neat	Legible but untidy	Poor organization	Illegible
Consistency & Effort	Consistent effort throughout semester	Mostly consistent	Inconsistent effort	Minimal effort	Last-minute or careless

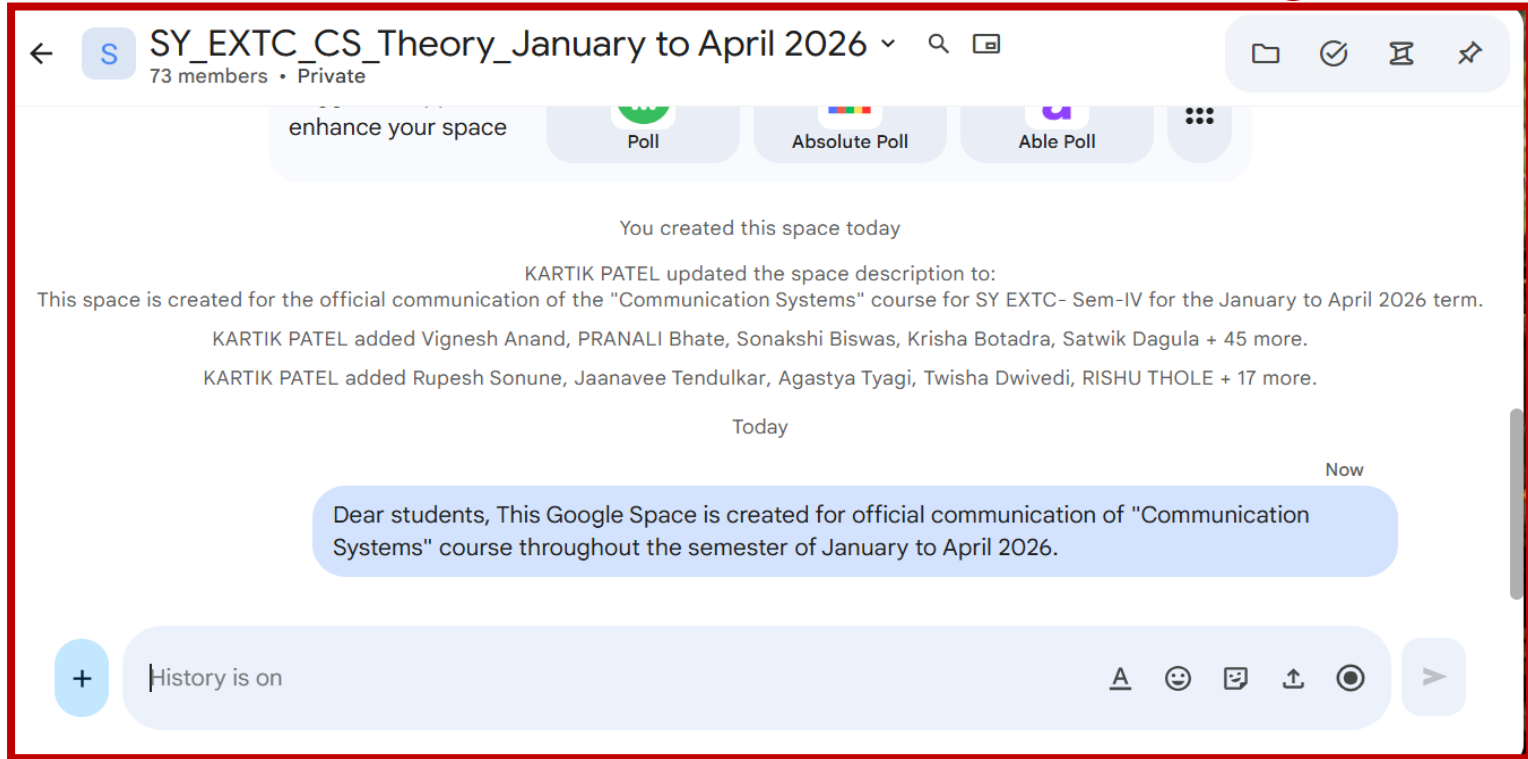

During Lecture

- Lecture will commence on time as per time table.
- Student have to ensure their presence in the class five minutes before the lecture time. No student will be allowed after teacher enter in the class.
- Attendance of the student is mandatory as per rules set by the college

During Lecture

- Students are expected to maintain Reflection Journal for each lecture
- Each student should have calculators (not of mobile) during each lecture (avoid sharing with friends)
- Any student will be asked question during the lecture for discussion
- Students have to maintain basic discipline during lecture

Interaction/Activities/Messages

The screenshot shows a Google Space interface. At the top, the title is "SY_EXTC_CS_Theory_January to April 2026" with a dropdown arrow, a search icon, and a camera icon. Below the title, it says "73 members • Private". There are icons for "enhance your space", "Poll", "Absolute Poll", and "Able Poll". A message from KARTIK PATEL states: "You created this space today. This space is created for the official communication of the 'Communication Systems' course for SY EXTC- Sem-IV for the January to April 2026 term. KARTIK PATEL added Vignesh Anand, PRANALI Bhate, Sonakshi Biswas, Krisha Botadra, Satwik Dagula + 45 more. KARTIK PATEL added Rupesh Sonune, Jaanavee Tendulkar, Agastya Tyagi, Twisha Dwivedi, RISHU THOLE + 17 more." Below this, a message from "Today" says: "Dear students, This Google Space is created for official communication of 'Communication Systems' course throughout the semester of January to April 2026." At the bottom, there is a text input field with "History is on" and a plus icon. To the right of the input field are icons for text formatting, emojis, attachments, and a send button.

Open Hours

- Any student can approach the faculty in this hours for any doubts/clarification/better understanding of concept/revising some content of lecture etc.
- Timings: Every Tuesday and Wednesday, 9:00 am to 10:00 am
- Duration: From start to end of term
- Location: Faculty office A-405

Numerical Solving/Practice Sessions

- Separate session for solving additional numerical and giving practice for more numerical will be conducted
- Attendance in this session will not be recorded and not compulsory. Interested students can attend.
- Timings: Will be planned as and when required
- Location: Regular lecture classroom, A-407

Lectures

Actual Lectures (as per term)	48
Required Lectures (as per syllabus)	45
Effective Lectures (after Holidays and non-instructional days)	36
Number of Extra Lectures required	9

Distribution of

LAB CA

In Laboratory

- Students are expected to come in time for laboratory sessions as per schedule
- Attendance will be taken in the laboratory in first 10 minutes.
- No students will be given attendance if they are coming after 10 minutes

In Laboratory

- Each student should have basic stationary items and calculator and graph papers, 3 to 4 (A4 size pages)
- All experiments are having waveforms and hence 7-8 linear graphs papers and 1-2 logarithmic graphs will be required throughout the course
- Students not having above items will not be permitted in the laboratory.

In Laboratory

- For each experiment student will be drawing circuit diagram, observation table, calculations and draw graphs
- Each page/graph student is writing should have roll number and name before submission
- Conclusion should be written by each student separately and not be shared with anyone (readings can be shared)
- Students will be completing post lab activities separately

In Laboratory

- Laboratory sessions are for discussion, interaction and performance and hence each student have to actively participate the experiment
- The group has to divide the work of performing experiment (mounting circuit, equipment setting, recording readings) in rotation
- Each student in the group will be monitored for their work and marks will be given accordingly

In Laboratory

- Laboratory sessions will have laboratory tasks as a part of LAB CA (schedule is given in document)
- Activities have to be completed by students individually
- No repetitions of LTs will be taken
- Basic discipline has to be maintained in laboratory
