(A Constituent College of Somaiya Vidyavihar University.)

ENGINEERING CHEMISTRY

Laboratory Write-up

F. Y. B. Tech.
(First Year- Semester II)

Name of student:

Division/ Batch NO. :

Roll No.:

Academic Year 20225- 2026

Instructions to the student

- Every student is expected to bring printouts of laboratory write-up/ assignments to be performed at the time of practical session as per his/ her schedule.
- Every student should take counter signature of the concerned faculty in-charge on the same day during laboratory session for the verification of outcomes of the experiment/ assignment.
- The write-up/ journal would consist of all the experiments performed during the academic semester complete in all respect along with graded term test papers. The journal may contain additional assignments as prescribed by the concerned faculty in-charge.
- The journal shall content A-4 size papers unless it is instructed for a particular subject.
- The students can use additional A-4 sheets if necessary for writing.
- Every experiment/ assignment should bear a cover page in standard format given with this write-up file.
- The contents/ index of the journal should be as per the standard format given with this write-up file.
- Students are expected to follow the instructions given by concerned faculty during laboratory session from time to time.

COMMON LABORATORY GLASSWARES

Pipettes

**Graduated
Cylinder**

Beaker

Burette

Conical Flask

Standard Flask

INDEX

No.	Name of the Experiment / Assignment	Date of performance	Date of Submission / Correction	Remark / Grade / Signature
1	To determine the normality of base using pH sensor.			
2	To determine the equivalence point in titration of a mixture of a strong acid (HCL) and weak acid (CH ₃ COOH) with strong base (KOH/NaOH) using conductivity cell.			
3	To synthesis of Zinc Oxide(ZnO) Nano particles using the co-precipitation method under alkaline conditions.			
4	To determine the optical band gap energy (E _g) of Cobalt (II) chloride using UV-Visibles spectrophotometry (v-lab)			
5	To find out unkown concentration of the sample and verification of Beer-Lambert's Law.			
6	To synthesis Iron oxide nanoparticles using the co-precipitation method
